-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to Database management system that method for electronically recording data associated with destinations, arrival on the waste route, classified in class 707, subclass 1+.
- II. Claims 14-17, drawn to Data processing, business practices, classified in class 705, subclass 4+

2. Inventions Group I, claims 1-13 and Group II claims 14-17 are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as electronically recording data for a waste route comprising the steps of: providing a device with data associated with destinations on the waste route; and repeating, for each of the destinations on the waste route, the steps of: traveling to a destination on the waste route; electronically recording an arrival time for the destination

Art Unit: 2166

on the waste route; electronically recording an amount of waste collected for the destination on the waste route; and electronically recording a departure time for the destination on the waste route as claimed, which is lacked features of the claims invention group II. Furthermore, the invention group I, also lacked features of the claimed invention in group II for example electronically compiling a master list of guests for the wedding; generating invitations for the wedding based upon the master list of guests and like [see claim 14]. See MPEP 806.05(d)

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
